

Laboratoires GRIMBERG welcomed Mr Jehan-Eric-Winckler, Sub-Prefect of Saint-Germain-en-Laye.

Visiting the Conflans-Sainte-Honorine industrial site on February 06, 2024, the sub-prefect was able to meet the teams and discover the production site: from manufacturing to the control laboratory. The detailed tour of the facilities and discussions with the management committee enabled the sub-prefect to highlight the investments planned by Laboratoires Grimberg thanks to the France 2030 plan. These investments are aimed at accelerating the transformation of key sectors of the French economy.

Laboratoires Grimberg's expertise and product ranges were presented to the sub-prefect.:

- ENT (Actisoufre, Solacy, Auricularum),
- Gastroenterology (Carbosylane, Carbosymag, Moxymar)
- Vitamin and mineral supplements (Spasmag et Calciforte VitD3)

>> A production « Made In France »

The support we receive from the French government in the form of grants enables us to promote and develop manufacturing in France. Laboratoires Grimberg is gaining in manufacturing flexibility and security thanks to our production site, built in 1995, and to the fact that :

- **Capitalize on human resources:** through the skills of our employees, who have acquired genuine industrial know-how over the course of their careers.
- **Sustainable investment in industrial facilities :** With the support of the French government, Laboratoires Grimberg is reinforcing its industrial excellence and accelerating towards factory 4.0 with the renewal of its machinery and the implementation of information systems using new technologies.

In discussions with the sub-prefect, prospects for partnerships with other players in the made in France sector were also discussed, with a view to securing supplies.
